Hi Theresa,

Regarding the water main replacement projects, please see the information below:

Dutton Road Water Main Project
This project is expected to begin in September and should take approximately five weeks. We do not plan to implement a detour route, as the existing water main is located 20–30 feet south of the roadway and we are utilizing the pipe-bursting method. However, there may be intermittent lane closures as needed to complete the tie-ins.

Henry Ford Water Main Project
This project will be presented to the City Council on June 22, 2026. If approved, work is expected to commence at the end of August, though it could potentially start sooner. The anticipated duration for this project is ten weeks.

Project Scheduling
Bidigare will utilize two separate crews, which may result in some overlap between the two projects. Please note that due to the timing of plan completion and permitting, the contractor has started another project, this is why our work is starting toward the end of the summer.

Please let me know if you have any questions.

Tracey Balint, PE
Interim Director/City Engineer
Department of Public Services
