# About the Permissions

## flock safety

<b>Admin</b>	Allows those assigned to access the Admin page (edit roles, users, networks, etc.)
<b>Networks</b>	List networks that are available for the role. Allows you to add additional networks to this role.
<b>Can Edit Organization Details</b>	Allows those assigned to the role to access the Organization page (edit organization location, allow/disable Lookup, enable MFA)
<b>Search</b>	Allows those assigned to access and conduct investigative searches.
<b>Lookup</b>	Allows those assigned to conduct specific plate search within your agency's devices, or other agency's devices who have also opted into statewide or nationwide lookup, or both.
<b>Hot List</b>	Allows those assigned to access the Alerts page to view Hot Lists, Manage Custom Hot Lists or Suppress hits.
<b>Custom Hot List Admin</b>	Allows those assigned to create, edit, share, delete & view Custom Hot Lists in their organization, as well as enable notifications on any Custom Hot List that is shared with their organization. <i>Select both Custom Hot List Admin &amp; Customer Hot List Access.</i>
<b>Custom Hot List Access</b>	Allows those assigned to create, edit and delete their own Custom Host List and view any list they are the selected audience of.
<b>Manage Suppressed Hits</b>	Allows those assigned to suppress individual plates for their agency.
<b>Vehicle Description Alerts</b>	Allows those assigned to send notifications when vehicles matching a specific set of filters pass a Flock camera. User must have Search & Hot List enabled to utilize this feature.
<b>Devices</b>	Allows those assigned to access the Device Management page (view device status, reboot device, etc.)
<b>Device Management</b>	Allows those assigned to access the "Device Health Page," to view their devices, status/health of those devices, rename/relocate the devices and register/unregister devices.
<b>Insights</b>	Allows those assigned to access the Analytics page.

<b>VMS Go-Live*</b>	Allows those assigned to the role to click on a device and view live video in the VMS experience.
<b>VMS Download*</b>	Allows those assigned to the role to download a defined start/stop time video clip.
<b>VMS Historical*</b>	Allows those assigned to playback previous video footage securely store in the cloud.
<b>Can Add Evidence to Axon**</b>	Allows those assigned to upload images from Flock to Axon's evidence.com after evidence.com integration.
