Sharing capabilities have been deactivated and cameras were turned off as of Sept 19th. We are scheduling to have Flock remove the cameras as well.

We're not renewing our contract with Flock, I believe the Board discussed some of these questions in September. My recollection is that our data was to be deleted after 30 days and have an auditable trail of who it was shared with.

[@Ponha Lim](#) - are the cameras and data sharing still in place until the contract expires?

This is interesting. I am not 100% sure, but I do believe the default sharing with Flock Safety cameras is limited. It seems like these law enforcement agencies perhaps unknowingly configured these cameras for broad sharing. This is an area where Ponha did an excellent job limiting our data sharing to those law enforcement agencies we work with.

Subject: Flock article

Sharing an article on how Flock shared data with Customs & Border Patrol. It mentions Black Diamond, Auburn, SeaTac, and Kent.

Feds searched security systems at 18 WA police agencies, report finds
