[Report Suspicious](#)

Wonderful! Thank you Johnny and Richard. I've shared this link with our team, and we will include it in our press release.

One thing that looks a little funky on my side is the "figures" section. It looks like there might be more, but I only see one. Would we want to add additional figures here?

Abstract and Figures

A growing number of law enforcement organizations are using and integrating Flock Safety technologies, specifically automated license plate readers (ALPRs), to enhance their crime control functions. While these technologies have significantly improved through development, their effectiveness in real-world usage requires evaluation. This study analyzes data collected by a representative sample of small, medium, and large agencies that use Flock technologies to measure the impact of Flock ALPR using regression analysis that measures product variables with public Uniform Crime Report data. Initial findings suggest a positive impact of Flock technologies on clearance rates. This warrants further examination of the impact of Flock technologies on specific crime types and statistical comparisons before and after these technologies were implemented.

I just went into the system through the link and confirmed authorship so it should now be linked to my profile also.

Let me know if this needs to be yanked. Rick, I couldn't find you in the system to link it to your directly but maybe you can figure that out.

Thanks,

Johnny

Hey Johnny! It looks good. One final edit - we need to fix the spelling of Cory's last name to be "Charpentier"

Other than that, we are ready to post it!

Ok – let me take a look and resend the PDF when I'm done. For some reason it's requesting access to the google doc again so I just sent that request.

Thanks,

Johnny

Hi Adam and Rick,

Here's the final PDF with a couple of minor typos corrected. I'm going to upload it to research gate right now and provide the link.

Johnny

Great! Thank you Richard and Johnny. Let me know once the paper is posted and we can pass along to Holly for the press release.

I just uploaded to the Box folder a spreadsheet of all agencies, their crimes reported / cleared by year from the NIBRS database, as well as the date where they started working with Flock. This should be some interesting data for the before / after studies that you were looking to do. Let me know if you have any questions about the data.

Adam

Hey Johnny,

This looks great! I made a few formatting edits in this version [here](#). Thank you!

Adam

Hi Rick (and Adam),

Here's a draft of the paper that's formatted. Since it's a white paper it's not fully formatted in APA but please have a look and further clean it up if necessary.

Thanks,

Johnny
